Erica Bell : Climate Change and Rural Child Health (Health and Human Development) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Climate Change and Rural Child Health (Health and Human Development):

Over the past 60 years, the world has seen gradual and hard-won progress in reducing child mortality and improving the lives of opportunities of children. Some of this is attributable to medical science, much of it to simple but public health measures. This title examines the connection between climate action and the future of children's health.
