Gail I. Smith : Coding Surgical Procedures: Beyond the Basics (Health Information Management Product)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Coding Surgical Procedures: Beyond the Basics (Health Information Management Product):

3 of 3 people found the following review helpful. New at codingBy jessicaI am studying for my certification exam for medical coding and I was wanting something to help me get a better feel at coding surgery. This book is very helpful and easy to read. Glad I purchased it0 of 0 people found the following review helpful. HelpfulBy Nancy BrewerHelped me out a lot.0 of 0 people found the following review helpful. The book was very useful. Unfortunately the CD doesn't workBy CustomerThe book was very useful. Unfortunately the CD doesn't work. I've tried it in several desktops and laptops to no avail.

Coding Surgical Procedures: Beyond the Basics helps you to develop the necessary coding skills required beyond the basic level. Surgical coding is the most difficult component of procedure coding. Each chapter focuses on the clinical aspect of surgical procedures and its application to procedure coding. Surgical procedures are mapped to official coding guidelines for an in-depth understanding of correct coding practice, and each chapter includes case studies, exercises, and resources to enhance your knowledge of surgical procedure coding. A partial answer key appears in the appendix so you can check your progress through the exercises and case studies. Includes a free trial of EncoderPro.

1: Introduction to Surgical Coding. 2: Integumentary System. 3: Musculoskeletal System. 4: Respiratory System. 5: Cardiovascular System. 6: Digestive System. 7: Urinary System. 8: Male Genital System. 9: Female Genital System. 10: Endocrine System. 11: Eye and Ocular Adnexa. 12: Auditory System.

About the Author
Gail I. Smith is an associate professor and director of the Health Information Management Program at the University of Cincinnati. She has been a Health Information Management professional and educator for more than three decades, has served as a coding consultant for several years, and has written or co-authored several successful coding textbooks. Ms. Bowie is an active member of the American Health Information Management Association (AHIMA) and previously served as a member of the organization's Board of Directors. She received her bachelor's degree from The Ohio State University and her master's degree in education from The College of Mt. St. Joseph.
