Various : EC Archives: Weird Science Volume 4 (The Ec Archives: Weird Science) before purchasing it in order to gauge whether or not it would be worth my time, and all praised EC Archives: Weird Science Volume 4 (The Ec Archives: Weird Science):

1 of 1 people found the following review helpful. A Feldstein grand slam! By Joseph A. Ardine As we come closer to the end of the EC Archives, it seems a true shame. Primarily because they keep improving in overall quality. Al Feldstein proves his writing chops yet again, this time penning each and every tale with only co-writing assistance here and there. The co-writing is handled by Ray Bradbury and Harlan Ellison, it should be noted! Feldstein does a wonderful job translating their short stories to the comic medium. Really some memorable tales here. The usual stable

of EC sci-fi artists are on hand to illustrate these gems and bring them to four color life. Wood does seem to personally shine in a science based setting. And Marie Severin's color jobs are reproduced almost without flaw, especially her contribution to the covers. I doubt that this series will ever warrant a negative review from me...they are truly a timeless treasure to read and re-read! 1 of 2 people found the following review helpful.
