One Of Best Comic Adaptations of Edgar Rice Burroughs Ever !By Stephen Vincent KemptonI have been waiting for this volume for a couple years now since it was first announced. But I am happy to report it was worth the wait.Edgar Rice Burroughs was the first author who's work I fell in love with as a boy. And some fifty years later I am still a huge fan. Pellucidar has always been my favorite World he created. So

here we get a very faithful adaptation of his first Pellucidar novel first published a 101 years ago. Bobby Nash does a masterful job of adapting the story. He reduces it to economical word usage but still retains the exact flavor of Burroughs. Jamie Chase art is striking using a mixture of what looks like pen ink and painted color he produces beautiful eye candy. I was so enamoured with his work I just ordered his previous work First World from . The story for those who haven't read the source novel or watched the Doug McClure movie is about David Innes . Innes explores the center of the earth in Professor Abner Perry's Iron Mole. The find a lost world of prehistoric monsters, cavemen and beautiful women. The book is a very handsome Hard Cover with a sewn binding and 104 pages on quality paper. With suggested retail of only \$14.99 this is a great value even before 's steep discount. I truly hope this venture produces a sequel volume , but in the meantime this one gets My Highest Recommendation. 3 of 3 people found the following review helpful. Highly Entertaining, Well Illustrated. By James Elfers Highly entertaining and well illustrated this graphic novel does a very good job of condensing ERB's prose while maintaining its flavor. "At The Earth's Core" is a by now quite familiar story. The tale has been told in movies, television shows, and cartoons, still the authors and illustrators keep events surprising fresh. Steam punk technology, an absent minded scientist, a stalwart hero, and a scantily clad cave girl; what's not to love? 1 of 1 people found the following review helpful. Five Stars By Belle Smith Great Book. Great condition. As described.

Edgar Rice Burroughs' 1914 pulp fantasy epic comes to life! Follow David Innes and Abner Perry as they take their "iron mole" five hundred miles below the Earth's crust to a world known as Pellucidar. Thrill as they cross paths with the evil Mahar, the ape-like Sagoths, and all manner of prehistoric creatures . . . as well as the lovely Dian the Beautiful! More than simply an epic adventure, At the Earth's Core is also one of Burroughs' most compelling love stories.
