Why isn't this a movie already?By Scott BakerWell, it would be very hard, even with today's technology, to bring out the depth of characters and pathos as in the excellent artwork in the Elephantmen series. That, coupled with Starkings' interweaving storyline of the GMO Elephantmen, means we will have to settle for a simply great graphic novel series instead for some time. The 0 and 00 origins are somewhat

confusing, but make sense in context of the later volumes in the series. Worth the ivory you pay for it!0 of 1 people found the following review helpful. Buy it.By XodyseusAn amazingly written story and should be read by more people. Looking for something new, give this a shot.

Collecting the sold-out War Toys trade paperback, now in full-color for the first time, and the sequel, *Enemy Species*, this highly anticipated *Elephantmen Volume 00* is packed with extras, including Moritat and Boo Cook sketchbooks and work by Ladronn, Marian Churchland, and Rob Steen, plus a new prologue by Axel Medellin!
