As good as the shows best episodesBy journeyThe Time Bender Trilogy is currently my favorite installment of the Futurama comic book series. I just love

the story haha. I don't know what kind of mad science was put into making this stuff, but you can HEAR the characters voices in your head while you're reading. It's AWESOME. 5 stars for you Futurama! You've outdone yourself as always! Btw, bring the show back please. While the comics are doing a good job at keeping me reeled into the Futurama universe, I miss watching Bender dance around and burp fire. 0 of 0 people found the following review helpful. hilarious! The four-part trilogy returns in an all new trade paperback collection. Fry, Leela, Bender, and Professor Farnsworth's clone/ward Cubert take an intergalactic trip, and when they return to Earth, they find the planet uninhabited. First, our merry band of messengers must fight off alien invaders bent on claiming the planet as their own. Then they must go in search of their missing colleagues as well as billions of citizens from Planet Earth. But "where are they?" soon turns into "when are they?" and "how" and "why" also make a little appearance. And before long the intrepid crew quite literally goes to hell and back again. Will the world ever get back to normal, or is everyone totally boned? Yes, there will be time travel#8212so bring a change of clothes!
