Brannon Braga, Terry Matalas, Travis Fickett : Star Trek: The Next Generation - Hive before purchasing it in order to gage whether or not it would be worth my time, and all praised Star Trek: The Next Generation - Hive:

8 of 8 people found the following review helpful. Better than other reviews say! By Alexander Tonks As a big Star Trek fan - and a Star Trek: The Next Generation fan in particular - I was really eager to get this comic. Without giving away any spoilers, its a great story, written by one of the actual writers for the TNG show. I enjoyed all, but one aspect of the comic - one of the major characters dies, but I won't say who as it would be a major spoiler. Despite what the other

reviews say, its a great story, worthy of the TNG title and crew. Also - I was surprised that most of the negative reviews about this comic was because it was a comic. How could those people not know its a comic? It clearly says so in the product description! Anyway, I strongly recommend this comic to anyone who wants to see what becomes of the Captain Jean-Luc Picard and his crew of the Starship Enterprise after the events of Star Trek: Nemesis. (I actually give this comic 4.5 out of 5, but since I can't do a half-star rating, it had to be rounded to 5 stars). 11 of 11 people found the following review helpful. Interesting, but we've seen things like this before. By Quinlan This was an interesting story concept, but we've seen many of the premises in this collection before. The time travel, the extra-dimensional enemy the Borg can't beat. I liked the art more than the story (though I don't think Data was captured right) because many characters didn't behave like I expected them to, particularly Seven of Nine. If you're an avid Trek fan this is, as my review's title says interesting, but only that. There's nothing really spectacular here. 1 of 1 people found the following review helpful. Braga should have written this well for Enterprise. By Reviewer from Terra I love time travel and alternate realities. This is a good story, well worth a read that would have been a fine Next Gen movie. The Borg have taken over and only a daring time travel mission can set things right. Better than the first three seasons of Enterprise.

In the distant future the entire galaxy has been completely assimilated by Borg and its king Locutus! The only hope lies in the past, in the hands of Captain Jean-Luc Picard and the crew of the Starship Enterprise as Picard faces off against the Borg collective in one final, terrifying, and definitive encounter!
