**From Dark Horse : Star Wars Tales, Vol. 1** before purchasing it in order to gage whether or not it would be worth my time, and all praised Star Wars Tales, Vol. 1:

0 of 0 people found the following review helpful. Star Wars minisBy Guy with BeardThis is a collection of short graphic novel stories. The characters range from major players like Darth Vader to very minor like the robot with the bad servo that Luke's uncle almost buys. The stories also range from serious to parodies.For the most part, I preferred the serious stories that added to the overall story. The little bits of information just add that nice feeling of getting to

see behind the curtain of the main stage show. The exception for me was the Jar Jar Binks story. It wasn't a bad story and it did add to the mythos. The problem was it was just so annoying reading the pigeon speech that they use. The parodies and humorous stories tended to be just silly. There is plenty of room for humor in Star Wars stories, but they still need to have a focus to them. They need to be more than just a joke. The artwork also had a wide range naturally. Usually, the more serious the story was meant to be, the better the artwork was. For some of the humorous stories, the artwork was very cartoony. I would have to say there are some very good stories with excellent artwork in this collection. But there are also some stories that just weren't that good with artwork that was fairly bad as well. So for the whole collection, I can only give it an average rating of three stars. 0 of 0 people found the following review helpful. The one that was good is about "Skippy The Jedi Droid" By Mr. Chunky Monkey Ideally I'd give issue one of star wars tales 2.5 stars. But 3 is ok. It is a compilation of different stories all of which are "non-canon". The one that was good is about "Skippy The Jedi Droid". The other stories are just bad in story and presentation. They have Mara Jade and she is depicted as a bimbo who wears impossible tall high heels, extremely tight leather, and let's say very large "assets". Another story has a certain Sith guy fight with a Jedi lady. She, strangely, is also depicted as barely having any clothes, despite the implied old age. She looks like she was 50 or 60 but had Botox to tighten her face. Anyways that character is also very weird for Star Wars universe. Don't think I am just a prude who wants to pick on depictions of women in comics. I am not like that. It's just the depiction of women in these short stories seems to be so sensualized and unrealistic, in addition to being simply out of place in the Star Wars universe. On the other hand, all of the comics in this compilation are essentially fan fiction, so there isn't a real standard of quality to base criticism on. 0 of 0 people found the following review helpful. Another look at a galaxy far, far away. By Will McPhillips Star Wars Tales puts to pen and paper what every fanboy out there has imagined. It takes beloved characters, and puts new spins on them by placing them in situations that they would never find themselves in film, or other media. The story doesn't just begin, and end with the main characters from Star Wars (Luke, Leia, Han, Chewie, Darth Vader and Maul, etc.), it develops whole new ones further breathing life into the background of the Star Wars Universe. It's not perfect by any means, and there's a lot that doesn't jive with the film characterizations, but if you take it for what it is, the Star Wars Tales volumes are all fairly enjoyable, and good value for the price.

Collecting the first four issues of the quarterly anthology smash sensation, Star Wars Tales contains thrilling stories featuring Darth Vader, Obi-Wan Kenobi, Han Solo, Emperor Palpatine, C-3PO, R2-D2, Lando Calrissian and a cast of thousands! Tales explores every corner of the Star Wars galaxy and keeps readers coming back for more! Star Wars Tales Volume I is sure to delight fans both young and old!
