Jason Aaron : Star Wars Vol. 2: Showdown on the Smuggler's Moon (Star Wars (Marvel)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Star Wars Vol. 2: Showdown on the Smuggler's Moon (Star Wars (Marvel)):

0 of 0 people found the following review helpful. The Force is still strong here. By scikaiju The second volume of the current Marvel comic series. It sort of picks up where the last one left off. It actually begins with a tale of Obi-wan Kenobi during his days on Tatooine, where he becomes a bit despondent having lost his way a bit with the Jedi Order gone and Owen Skywalker not letting him train Luke, who I want to say is eightish here, and feeling helpless as Jabba tax men collect mater from the people during a drought... on a desert planet. Only in Star Wars. After that we pick things back up where things did leave off. Leia and Han have to deal with Han's wife, who was an interesting character in her own right. Luke on the other hand goes off to Nar Shaddaa in order to try to get smuggled onto Coruscant in order to sneak into the old Jedi Temple. Things don't go well, pretty sure that's not a spoiler. Han's "wife" Sana was an interesting character, although her story line wrapped up a little quicker than I expected. I was hoping it would have lasted another arc or two before the reveal happened, but hopefully she returns in some fashion down the line. Luke's story was pretty cool but now I have to get the second volume of Vader to see if the end intersected there like they did with his finding out Luke's last name in vol 1 of their particular story arcs. Either way I would recommend this volume as a Star Wars fan.

3 of 3 people found the following review helpful. The Force is strong with Aaron. By Ryan Read I have been very happy with the new line of Star Wars Books (except maybe Chewbacca). Jason Aaron continues to perfectly craft the world of Star Wars between A New Hope and Empire Strikes Back. However, while I loved the light sabre battle in this story with the entire cast. What really shines are the Tales of Ben Kenobi tales. While one off tales in all of the Star Wars stories by Aaron. They really show the lost warrior forced into exile by the fall of the Republic and set on a lawless world with one mission. Keep up the great work.

0 of 0 people found the following review helpful. Not as Good as Volume 1 By James Simmons I didn't find this story quite as interesting as Volume 1, but it was still fun. I didn't particularly like the plotline with (SPOILERS) Han Solo's 'wife' in it. I wasn't really a fan of the whole Nar Shaddaa story either, but the characters are always interesting and this comic series captures the characters wonderfully, so I keep reading. I had already read Vader Down while I was reading the Darth Vader series, so my next comic is Volume 3.

Injustice reigns on Tatooine as villainous scum run rampant. Will Ben Kenobi risk revealing himself to do what's right? Then, Luke continues his quest to learn about the Jedi by heading for the Jedi Temple on Coruscant. Plus: Han Leia are confronted by an unexpected foe from Han's past!

COLLECTING: STAR WARS 7-12
