Great for older kids/adultsBy SeaweedI read this when I was a kid, and loved the story and the art.It is a great book, it isn't the same turtles you see in the cartoons, these are a bit more gritty and dark.I wouldn't recommend it for small kids, but older kids and adults will love it.0 of 0 people found the following review helpful. Five StarsBy Camits great!7 of 7 people found the following review helpful. Pretty good!By Benjamin GuilfooyThis graphic novel is a reprint of several old issues of "Teenage Mutant Ninja Turtles," and was the basis for the first TMNT movie. If you've seen the movie, you'll know how a lot of this goes - one of the turtles is ambushed (though here it is Leo, where in the movie it was Raph) and April's apartment gets trashed, and the Turtles head off into the country to at an old, dilapidated home (this time, April's instead of Casey's) in Northampton, Massachusetts (the birthplace of TMNT).The story moves quickly, and is continued elsewhere, so you won't get the end here, nor the beginning. But the dialogue is crisp, and the artwork is excellent (if a bit simple). It's an enjoyable read, in the end, which is really all that matters. It takes itself more seriously than the movie did, and is a bit more adult overall, especially with such scenes as April having post-traumatic nightmares about the Shredder.
